MEMORANDUM FOR:

25X1

I would like to conclude this Survey of the Records Center by

25X1

I reviewed each of his 15 Survey Recommendations and commented on each asking for implementation suggestions on some. He in turn charted my comments and came back with further explanations. He just does not communicate to me.

Finally, I reviewed each of your comments attached to the original Survey Report and asked Ray for his clarification on several of those items. I have found nothing new or fruitful in those responses. Many have only compounded the confusion. The reporting formula being the most notable example.

This Survey has disappointed me in the amount of time and energy I had to put into it and the absence of new ideas or progress it produced. I am not inclined to put any more of anything into this Survey. Ray does not indicate he learned anything and has not changed. I see no opportunity left in this to improve his approach to it or his work attitude in general or to develop any substantive information or proposals about the Center. I have assigned him to other tasks. I am trying new methods I hope will be more productive. If you have no objection I will close this Survey and go on with more pressing matters without further ado,

25X1
